## Benefits

### Bountiful Harvest

When Bountiful Harvest bio-stimulant is applied to the soil, increased enzymatic and microbial activity release tied-up nutrients. These nutrients are then available to be taken up more readily by plants. This tremendous increase in the availability and uptake of nutrients has a direct influence on the growth and development of the plant, resulting in higher quality and better yield.

The benefits of Bountiful Harvest Bio-Stimulant are not limited to its effect in the soil. Bountiful Harvest also provides tremendous benefits when applied to the foliage of growing plants. Bountiful Harvest contains micronutrients, growth hormones, enzymes, and amino acids. When applied at certain stages of plant development these ingredients can significantly improve plant growth and yield.

Applying Bountiful Harvest Bio-Stimulant to the foliage increases photosynthesis and the plant's ability to metabolize carbohydrates, proteins, and other growth compounds contained in the leaves and transfer them to the root system. From the root system these compounds move out into the rhizosphere, feeding bacteria, algae, fungi and protozoa which in turn produce beneficial enzymes, organic acids, antibiotics, growth hormones and other nutrients. These growth stimulants are then re-absorbed by the roots and transported back through the plant system producing higher yielding healthier crops.

**DISCLOSURE:** Bountiful Harvest® is a nutritional supplement to the soil and plant. It is NOT a pesticide, fungicide or insecticide and is not intended to replace the role of such inputs by any grower who uses such products. Any statements or reports contained herein regarding the product's benefits or mode of action are the result of a nutritional response by the plant from the soil ecosystem.

## Product Info

### Turf Formula Nutrient Activator

**For a fertility program that is a cut above the rest, use Turf Formula and Super-Cal. It could be just the edge your turf program needs this season.**

Turf Formula Bio-Stimulant Nutrient Activator is a scientifically balanced formula of micro-nutrients, carbohydrates, enzymes, amino acids, stabilized liquid oxygen, and other natural growth stimulants. Turf Formula Bio-Stimulant Nutrient Activator boosts both plant and root growth, and works to provide the maximum release and uptake of nutrients in the soil for turf grass production.

University research has shown Turf Formula Bio-Stimulant Nutrient Activator increases nutrient availability up to 68%. Research also proves that Turf Formula Bio-Stimulant Nutrient Activator lowers sodium levels in the soil and plant tissue. Since sodium competes with potassium for uptake, high sodium levels can greatly reduce the plants ability to absorb nutrients. High sodium levels are also conducive to high nematode counts.

## Use Super-Cal with Turf Formula for maximum results!

### SuperCal Liquid Calcium

When planning your fertility program for nitrogen, phosphorus and potassium, remember to include a column for Super-Cal liquid calcium. It could be the edge your turf needs this season!

## Benefits

### Turf Formula Nutrient Activator

The following points are advantages of using Turf Formula. [Contact us](#) for more information on Turf Formula benefits, usage, and availability.

**Turf Formula increases fertilizer and chemical efficiency.**

**Turf Formula reduces alkalinity, salt buildup and chemical carryover.**

**Turf Formula increases sugar and protein content in leaf tissue.**

**Turf Formula builds humus, speeds up the breakdown of organic matter and thatch.**

**Turf Formula increases root mass and penetration, improves uptake of water and nutrients from soil.**

**Turf Formula improves the overall health of turf grass resulting in better resistance to insect and disease pressure.**

**Turf Formula promotes faster recovery of turf.**
